FIRE SOAPS™ FABRIC SANITIZER is a concentrated, ready-to-use liquid fabric sanitizer. Used in the final rinse, **FIRE SOAPS™ FABRIC SANITIZER** leaves behind a finish that is both self-sanitizing and bacterio-static. Under conditions of contamination, **FIRE SOAPS™ FABRIC SANITIZER** continually eliminates 99.9% of infectious bacteria. Unlike bleach, which stops working after textiles are removed from the wash-wheel, **FIRE SOAPS™ FABRIC SANITIZER** remains active on textile surfaces, continuing to aid in the prevention of cross-contamination from both Gram Negative bacteria (ie. Klebsiella pneumonia) and Gram Positive bacteria (ie. Staph, a major cause of hospital acquired (*nosocomial*) and Community Acquired infections), providing protection throughout the use cycle of the uniforms, linens and other textiles. **FIRE SOAPS™ FABRIC SANITIZER** leaves behind a ZONE OF INHIBITION that prevents newly acquired bacteria from growing on the fabric surface.

ELIMINATES 99.9% of INFECTIOUS BACTERIA

- ⇒ Reduces bacterial count by minimum 99.9%
- ⇒ Kills odor-causing bacteria
- ⇒ Effective against Staph & Strep
- ⇒ Continues working throughout the textile use-cycle
- ⇒ Won't irritate skin

** FIRE SOAPS™ FABRIC SANITIZER is anaturally plant derived didecyldimethyl ammonium chloride manufactured from 91% naturally bio-renewable planderived feedstock, REACH Pre-registered, BPD Notified and EcoLogo Certified for use in Canada.*
